

Commercial Dumbbell Rack

LIFETIME WARRANTY

PARTS CHECK

STEP 1

Using 1x Upright, 1x Base Beam, 2x Upright Brackets, and 6x Bolt Sets, build each side of the rack. You can go ahead and tighten these bolts up.

STEP 2

Next you can add your Top, Middle, and Bottom angle beams using 2x bolt sets each. The Top will be as high as it can go, then skip 3 holes and add the Middle, then skip 3 holes and add the Bottom. You can go ahead and tighten these bolts up as well.

STEP 3

Now you can add each set of Angle Iron beams to complete the rack. There is a top and bottom which you'll notice by the countersunk hole. If you have a single rack or at the end of one side, use the outer holes and cover up the inside. If you're continuing on one side to extend it further then use the inside holes so the next set of Angle Iron beams will fit.

Congrats! Your rack is ready to use.

If you have any questions at all please don't hesitate to call us at 904.747.0789 or email sales@strengthdepot.com
